Growth in 2018 was modest, as deposits increased to $\$ 1.573$ billion at December 31, 2018, representing $4 \%$ growth from 2017. This growth reflected modest growth in retail and business deposits. Net loans increased to $\$ 2.009$ billion, representing $10 \%$ growth from 2017. Total assets increased to $\$ 2.409$ billion, representing $5 \%$ growth from 2017. During 2018, the Bank reduced the balance of excess reserves held at the Federal Reserve Bank, in order to minimize the carrying cost of its on-balance sheet liquidity. Book value per share was $\$ 99.67$ as of December 31, 2018, representing $14 \%$ growth from December 31, 2017. In addition to the increase in book value per share, the Bank declared $\$ 1.92$ in dividends per share in 2018, including a special dividend of $\$ 0.50$ per share declared during the fourth quarter of 2018. The Bank announced increases in its regular quarterly dividend in June, September and November of 2018. The trailing five year compound annual growth rate in book value per share, an important measure of long-term value creation, rose to $15.5 \%$.

Key credit and operational metrics remained strong in 2018. At December 31, 2018, non-performing assets totaled $0.02 \%$ of total assets, compared to $0.07 \%$ at December 31, 2017. Non-performing loans as a percentage of the total loan portfolio totaled $0.02 \%$ at December 31, 2018, compared to $0.09 \%$ at December 31, 2017. The Bank recorded $\$ 1,000$ in net recoveries in 2018 and $\$ 2,000$ in net recoveries in 2017. At December 31, 2018 and 2017, the Bank did not own any foreclosed property. The efficiency ratio fell slightly to $29.89 \%$ in 2018 , as compared to $30.06 \%$ in 2017 . Operating expenses as a percentage of average assets improved to $0.87 \%$ in 2018, as compared to $0.92 \%$ in 2017. These metrics reflect the Bank's disciplined focus on credit quality and expense management.

Chairman Robert H. Gaughen, Jr. stated, "Returns on equity and assets were adequate in 2018, although competitive pressure remains acute. The real test of performance in banking is a company's record of compounding shareholder capital over time through the disciplined management of credit risk and operational expense. On this measure, our team strives to set a high bar.

In 2018, the decline in the market value of our equity investments, concentrated in financial services, ratings, and payments companies, was decremental to our book value per share, as opposed to prior years in which these investments were accretive to our core business. As noted before, the Bank views these equity investments as long-term partnership interests in operating companies and consequently does not view short-term fluctuation in market value, whether positive or negative, as necessarily indicative of the change in the intrinsic value of the businesses in which we invest."
